

Ranking and Modding

The Necramech features 12 mod slots unlike other vehicles (e.g. [Archwings](#) or [K-Drives](#)). To compensate, each [polarization](#) increases its [rank](#) by 2 up to a max of 40 after 5 [Forma](#), increasing mod capacity to a total of 80 at rank 40 with an [Orokin Reactor](#) installed. Additional polarizations can be added when the Necramech reaches its new max rank at that polarization level. Each additional rank also gives [Mastery Rank](#) Experience, giving 8,000 points in total.
